

WHY CHOOSE FSU'S SCHOOL OF INFORMATION?

The Bachelor of Science in Information Technology degree prepares students for rewarding, high-impact careers in the rapidly evolving field of information technology. With a strong emphasis on innovation, leadership, communication, and hands-on learning, students develop the technical expertise and critical thinking skills needed to solve complex challenges in today's digital world.

Two Majors to Choose From

- Information Technology (IT) equips students with the knowledge and skills to design, manage, and secure information systems while applying ethical principles to solve real-world challenges.
- Information, Communication, and Technology (ICT): This interdisciplinary major combines IT with Communication foundations. Students develop skills in emerging technologies, web design and development, digital media, advertising, and effective communication to prepare for careers in today's technology-driven world.
